EXPERIENCE

Algorithm Design/Analysis I

Waterloo, ON

Group Leader

- The use of **HTML and CSS for creating a website** with team introductions and a heart animation.
- **Review the website design** and ensure that all team member introductions are included.
- **Test the heart animation functionality** and make any necessary adjustments or improvements.
- **Conduct a final review of the website** to ensure it meets all requirements and is ready for deployment.

Pricing Component

Waterloo, ON

Individual project

- Users can easily view the optimal layout of the component according to their device's screen size.
- The toggle can be controlled effortlessly using both mouse/trackpad and keyboard inputs.
- Component's layout adjusts seamlessly to provide an enhanced viewing experience on different screen sizes.
- Users have the flexibility to switch between different layouts with ease and convenience.

Product Landing

Waterloo, ON

Individual project

- **Determine layout, columns, and alignment.**
- Divide the landing page into sections to **organize content and improve readability.**
- Ensure all elements like text, images, and buttons are **properly positioned.**
- Familiarize with cropping images and using design templates for a polished look. **Resize and crop visuals** to fit the designated spaces.
- Use design templates to **create a cohesive visual style.**
- Continuously assess the layout, alignment, and editing tasks to **enhance effectiveness.**

Login/registration platform

Waterloo, ON

Individual project

- The login/registration form is a user authentication interface crafted using a combination of **HTML, CSS, and JavaScript.**
- The first form caters to user login, comprising input fields for a username and password, along with a login button. The second form facilitates user registration, featuring fields for a desired username and password, along with a registration button.
- The CSS stylesheet styles the forms and the container, employing a clean and modern design.
- Additionally, it incorporates an overlay effect for a seamless transition between the login and registration forms.

LEADERSHIP EXPERIENCE

ETHICS & PROFESSIONAL PRACTICE - CP373

Waterloo, ON

Group project leader

- **Set up a meeting** to discuss and address any outstanding issues before proceeding with document finding.
- **Assign specific tasks** to each team member and **establish deadlines** for their submissions before starting synthesis. Ensure all members complete their assigned tasks and submit their work on time.
- **Create a comprehensive slideshow** incorporating all relevant information and **finalize it for distribution**.
- Share the completed presentations for **review and feedback**. Make necessary revisions based on the feedback received and finalize the slideshow.
